Sarthi सारथी

GREAT INDIAN AI INTERNSHIP CHALLENGE · BUILT ON GNANI PRISMA + TIMBRE

She travelled 2,000 km to see it. Nobody there spoke her language.

Meet **Meenakshi, 68, from Chennai** *(an illustrative traveller). At Humayun's Tomb a guide recounts 450 years of history, fast, in a language that isn't hers. She smiles, nods, and understands almost nothing.* **The story is right there. She just can't hear it.**

नमस्ते · வணக்கம் · নমস্কার · Hello

WITH SARTHI · HUMAYUN'S TOMB · TAMIL

தாஜ்மஹாலுடன் என்ன தொடர்பு?
"What's the connection with the Taj Mahal?" (spoken)

Sarthi, aloud in Tamil: "This tomb is the direct prototype of the Taj Mahal. Shah Jahan scaled up its double dome and Charbagh gardens 60 years later."
From the site's authored notes

For the first time, the monument talks to her.

THE GAP

Heritage speaks a few languages. Visitors speak hundreds.

- ✕ Guides speak the crowd's language, not yours.
- ✕ Audio guides play a script. They can't answer you.
- ✕ Booking apps end at the ticket, not the day itself.

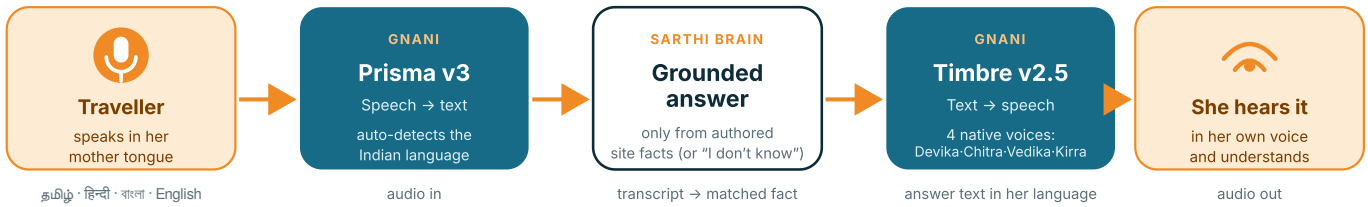

THE IDEA

Sarthi, the charioteer who drives your day.

A voice-first guide that **plans** your trip, **walks beside you** through each monument, **answers spoken questions** in Tamil, Hindi, Bengali or English, then decides **"what next?"** as the day unfolds: food, rest, or the next stop.

One question, end to end

How a spoken question becomes a spoken answer, with Gnani at both ends

Her whole day, in her mother tongue

Planning and on-site guidance in one flow, not two apps

How we use Gnani

- **Prisma v3 (STT):** spoken questions with *indic-auto* language detection.
- **Timbre v2.5 (TTS):** narration and answers in four native voices: Devika (EN), Chitra (HI), Vedika (TA), Kirra (BN).
- **Production-minded:** one FIFO queue honours Gnani's one-request limit; duplicate calls merged; retries with backoff; audio cached; keys stay server-side.

Trust by design

- Answers come from **authored site facts**, not free-form guessing.
- If it isn't sure, Sarthi says **"I don't have a reliable answer"** instead of inventing history.
- Every AI path has a fallback, so the guide never goes silent.

Built and working

- **6 Delhi landmarks**; guided walks authored for Humayun's Tomb, Red Fort and Qutub Minar.
- **4 languages** across the whole app, not just the voice.
- Planner, photo check-in, What-next engine and Trip Story included.

WHERE SARTHI FITS THE CHALLENGE

Main Character · Tamil, Bengali, Hindi

Real Deal · a real traveller's problem

Regional-language voice is the product, not a feature, and the rate-limit, retry and caching edge cases are already handled.

WHAT'S NEXT

More Gnani languages · Streaming TTS · Evon (open weights) · More cities

Stream Timbre for a faster first word; swap Gemini for Gnani's open-weight Evon to make the whole stack Indian.

India's heritage should speak to **every Indian**, *in the voice they grew up with.*
